		CS Awarh

Continuation of 5. Applicant's reply has overcome the following rejection(s): Written description, indefiniteness, prior art rejections and obviousness rejection over Dallavalle's reference.

Continuation of 11. does NOT place the application in condition for allowance because: It does not overcome enablement rejection and obviousness rejection over Penco's reference in view of Bom's reference. The Penco's reference teaches antitumor activity of camptotheicn compounds substituted at 7th position with an alkyl oxime group while Bom teaches enhanced stability of camptotheicn compounds by expansion of E-ring to a 7-membered ring and therefore, it would have been obvious to one skilled in the art to prepare the instant compounds of formula (I). In regard to enablement issues, the specification has support for treating lung tumor only. Also, the amendment of claim 1 deleted the value of variable R1 as hydrogen. This amendment raises new grounds of rejection for claims 6 and 8 for lacking antecedal basis.
